

Quick Rack™

Patented Rail-Free Mounting System

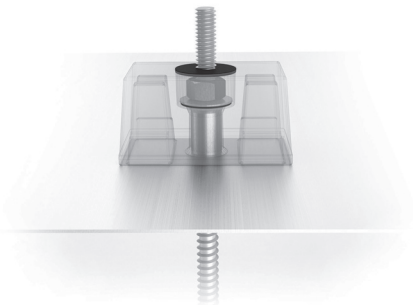

Quick Mount PV®
RESPECT THE ROOF

The No-Compromise Rail-Free Mounting System

Quick Rack™ is a simple, cost-effective and elegant rail-free solar mounting system. Featuring QRack® technology, the patented system is an integrated roof mount and racking system, engineered to be robust and structurally sound. Quick Rack is fast and easy to install, with only a few components and minimal tools required. Quick Rack features integrated flashing and grounding, requiring only one ground lug for up to 300 contiguous modules. By eliminating long rails, material handling, installation time and labor costs are significantly reduced. Quick Rack also comes with easy-to-use design software that assures every solar array is accurately designed and code-compliant.

The Quick Rack system features superior waterproofing technology with Quick Mount PV's patented elevated water seal. This ensures long-term water seal integrity and waterproofing for the life of the roof and solar array.

Quick Rack's superior waterproofing technology

Features & Benefits

- Works with standard module frames - providing greater flexibility
- Superior waterproofing with Quick Mount's patented Elevated Water Seal technology
- Engineered to be structurally robust & simple, with minimal leveling
- Elegant, sleek design means more referrals from happy homeowners
- Easy to handle and transport - ships in small boxes
- Cost savings with integrated grounding, requiring less copper wiring and grounding hardware
- Comes with Quick Mount PV's easy-to-use design software, assuring every solar array is accurately designed and code-compliant
- Accessories available to easily attach module-level electronics, such as micro-inverters, optimizers, and electrical boxes

Certifications

- 2015 International Building Code
- 2016 California Building Code
- UL System Fire Class Rating A, Type 1 & 2 Modules

- UL STD 2703
- ASCE 7-10

Installation Is As Easy As...

1

A 5kW system with all required components ships in a few boxes. No long rails means less warehouse space is needed and more install jobs can fit on a single truck. Fewer boxes means it's fast and easy to get materials on the roof, ready to install.

2

By eliminating rails, installation is fast and less labor-intensive. The installation process is mounts-to-modules, instead of mounts-to-rails-to-modules, saving you time and money.

3

Works with standard modules. Simply drop in the modules, tighten down the clamps, and you have a sleek, attractive solar array - and that means more referrals from happy homeowners.
