

### Description

The remote battery temperature sensor allows the monitoring of the battery bank so that the charging profile can be adjusted to optimally charge the battery bank depending on the temperature of the battery bank.

One Battery Temperature Sensor is included with every Analytic Systems battery charger. Extra sensors can be used with the Analytic Systems BCA or BCD series chargers to monitor additional battery banks. Extra sensors can also be ordered as spares.

### Benefits

- ◆ Enables Battery Monitoring
- ◆ Enables Charger Temperature Compensation
- ◆ Enables Over-temp Shutdown

### Applications

- ◆ Marine, Recreational Vehicles
- ◆ Remote Generators
- ◆ Heavy Equipment
- ◆ Freight Transportation Equipment
- ◆ Solar / Wind / Microhydro systems
- ◆ Remote Installations

### Specification

Model #	Used With	Connections	Dimensions	Weight
BTemp 1.2	BCA / BCD	Comm Port	10' (3M)	0.1lbs
<b>Design Features</b>				
Preset to 77°F (25°C)				
Easy to use
