CLIM

A scenic coastal landscape featuring a gravel path leading down a grassy hillside. A wooden fence runs along the path. In the background, a bay with blue water is visible, surrounded by green hills and a bright sky. Pine trees are in the foreground, framing the scene.

MATE

COMFORT BY DESIGN

AIR CONDITIONERS

BLIZZARD NXT

The Dometic Blizzard NXT air conditioner can be installed in height-restrictive spaces, making it ideal for flybridge, cockpit, engine room, or exterior deck installations. The air conditioner stands just 8 in/203 mm high. The dual blowers can be ducted to different areas or to confined areas such as flybridge dashboards and consoles. The unit features an oversized four-row evaporator coil for excellent heat removal under low fan-speed conditions. A highly efficient blower reduces power consumption, and the blower flows to two outlets.

- Attractive aerodynamic design
- Rugged and durable
- High-impact polypropylene injection-molded shroud and base pan

PENGUIN II LOW PROFILE HEAT PUMPS

The Dometic Penguin II Heat Pump provides year-round heating and cooling of recreation vehicles and campers. With a low profile under 10 in/25.4 cm, the sleek shroud reduces wind resistance while the vehicle is underway. By using advanced composite materials and advanced design, Penguin II delivers better comfort more efficiently than many other similar models. For non-ducted applications, a Dometic Air Distribution Box is required (available separately).

- Low profile – under 10 in/25.4 cm high
- Sleek, contemporary shroud design
- Eco-friendly refrigerant heats more efficiently

PENGUIN II LOW PROFILE AIR CONDITIONERS

The Dometic Penguin II Rooftop Air Conditioner features a futuristic look with powerful cooling performance. With a low profile under 10 in/25.4 cm, the sleek shroud reduces wind resistance while the vehicle is underway. A rib-reinforced base pan delivers lasting strength. The Penguin II is perfect for non-ducted cooling systems. Non-ducted application requires Air Distribution Box (ADB) (available separately).

- Low profile – under 10 in/25.4 cm high
- Sleek, contemporary shroud design reduces drag for improved mileage
- Perfect for ducted or non-ducted cooling systems

BRISK II HEAT PUMPS

The Dometic Brisk II Heat Pump provides year-round heating and cooling of recreation vehicles and campers. Stronger, lighter, smaller and more environmentally friendly than the previous version, the Brisk II rooftop unit features tighter specification tolerances to maximize air flow and performance. By using advanced composite materials, Brisk II delivers better comfort more efficiently than many other similar models. For ducted applications, a Multi-Zone Comfort Control Center II thermostat is required.

- High-performance design
- EPP foam housing
- Fits standard 14 in/35.5 cm roof vents

BRISK AIR II COOL ONLY

The Dometic Brisk II Rooftop Air Conditioner is the next generation of one of the most popular and imitated RV air conditioners. Stronger, lighter, smaller and more environmentally friendly than the previous version, the Brisk II features tighter specification tolerances and improved materials to maximize air flow and performance. Non-ducted application requires a ceiling-mounted air distribution box (ADB). Ducted installations are controlled with the CT Single Zone thermostat. (ADB and LCD thermostat are available separately).

- High-performance design
- EPP foam housing
- Custom-composite laminated shroud

COMMERCIAL GRADE AIR CONDITIONERS

Dometic Commercial Grade rooftop air conditioners are performance-tested to overcome harsh and unusual road and weather conditions. Many standard units break down after just four hours of extreme vibration testing, while the Dometic Commercial Grade is still going strong at 30 hours and more.

- Rugged and strong, yet lightweight
- Galvanized steel top plate for lasting strength
- Motor, compressor and evaporator are bracketed together for vibration-free operation
- Dual rubber bushings at top and bottom control noise and vibration
- Powder-coated base pan is 15 % thicker than other models
- Long copper lines are designed for minimal vibration
- Eco-friendly 410A refrigerant

COOL CAT HEAT PUMP

The Dometic Cool Cat provides heating and cooling in small spaces. The compact size allows it to be installed in a variety of places without taking up a lot of space.

- 10,500 BTU cooling capacity
- Efficient heating to 30°F ambient temperature controlled by an LCD soft touch thermostat
- Under bunk/counter installation maximizes interior space options
- Lightweight, robust construction with simple installation
- Easy access, washable micro-weave air filter
- Slinger fan system increases the condenser efficiency

WEATHERPRO AWNINGS

Automatic | Vinyl or Woven Acrylic

Designed to out-think the elements, the WeatherPro is the great-looking awning you've always wanted – with the ease and convenience of self-operation by remote control. The Wind Sensor's "smart technology" automatically closes the awning when it detects potentially dangerous wind conditions.

With just the touch of a button, from either the handy remote control or the switch mounted inside the coach, the WeatherPro extends and tensions the fabric. Another touch and it stows away, securely locked for travel.

- Solid-state sensor automatically closes awning after detecting sustained winds
- Wireless remote control operates patio and door awning individually
- Exclusive Knee Action Design™ allows the awning to flex in moderate wind to prevent damage
- Metal weathershield provides extra protection from elements, matches hardware finish
- Heavy-duty motor is fully contained in the roller tube, self-locks awning in travel position
- Unique spring-arm mechanism automatically releases accumulating rain water
- Fits all straight hardware applications

Single compact remote control can operate WeatherPro and your Dometic power door awning.

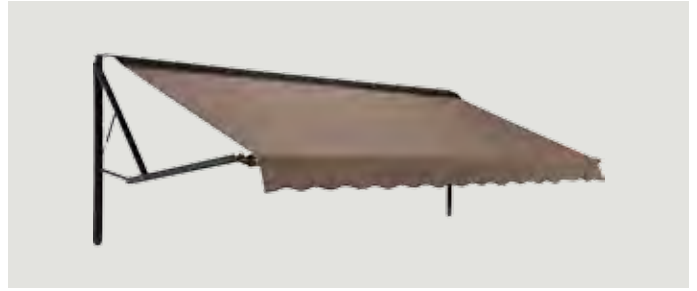

The wind sensor is located at the very edge of the roller tube for maximum accuracy.

Dometic's exclusive Gustguard allows you to customize wind sensor settings with a simple one-touch control.

9100 POWERCHANNEL AWNINGS

Patio | Automatic | Vinyl or Metal

The PowerChannel is an innovative and convenient option available with the 9100 Power Awning. The awning's roller tube contains the PowerChannel which provides a track of electrical power along its entire length that Dometic accessories can tap into without using any cords or wires.

DETERMINING SIZE OF SLIDETOPPER™

HOW TO MEASURE FOR YOUR SLIDETOPPER:

To determine which size of SlideTopper you require, measure your room according to the picture and reference chart below. The SlideTopper will not work on rooms with a full extension greater than 42".

ROOM WIDTH	RECOMMENDED SIZE
56" to 61.75"	66"
62" to 67.75"	75"
68" to 73.75"	78"
74" to 79.75"	84"
80" to 85.75"	90"
86" to 91.75"	96"
92" to 97.75"	102"
98" to 103.75"	108"
104" to 109.75"	114"
110" to 115.75"	120"
116" to 121.75"	126"
122" to 127.75"	132"
128" to 133.75"	138"
134" to 139.75"	144"
140" to 145.75"	150"
146" to 151.75"	156"
152" to 157.75"	162"
158" to 163.75"	168"
164" to 169.75"	174"
170" to 175.75"	180"
176" to 181.75"	186"
182" to 187.75"	192"

OPTIMA TENSION RAFTER SYSTEM

Acrylic fabric, Metal Weathershield

- Supports and stabilizes the awning – open or closed
- Keeps canopy tensioned
- Provides ground support when the awning is in the patio position
- Easy to mount and operate
- Completely self-storing
- Fits any brand of automatic roll-up awning
- Storage cradle lifts and supports the rolled-up awning for travel

Optima Tension Rafter System Includes:

- Self-adjusting tension rafter/storage cradle
- Center ground support

Available as a complete system in one attractive package or purchase separately.

SYSTEMS REPLACEMENT FABRICS

Don't have a Dometic awning but want to have Dometic quality in a replacement fabric? It's not a problem. Dometic offers a full range of stylish fabrics in woven acrylic or durable vinyl to match your current hardware. Keep your hardware, but refresh or repair your fabric with genuine Dometic replacement awning fabrics. We can create the perfect replacement fabric for your RV.

See page 31-32 for instructions about measuring your awning for replacement.

NOTE: Use B3104936[XX].X08 through .X13 and .X22 and .X25 for fabric color.

AWNING INSTALLATION MEASURING

PATIO AWNINGS

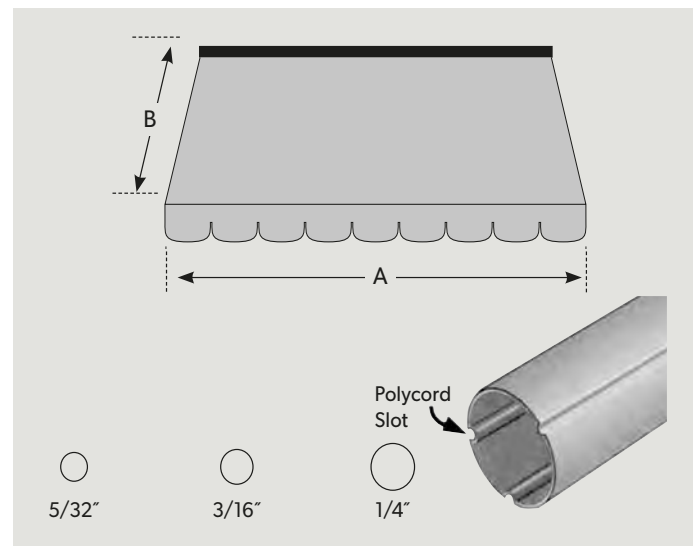

1. When installing a new patio awning on a recreational vehicle, the location of windows, doors, storage compartments, and trim must be considered so the awning will not block or obstruct them. The floor line and solid structural members must be located for proper and secure mounting of hardware.
2. The true awning length is obtained by measuring between top casting to top casting, center-to-center (see illustration).
3. The two bottom mounting brackets should be positioned directly in line with the floor line of the vehicle. Make sure the center-to-center distance between the two bottom mounting brackets is exactly the same as the distance between the two top mounting brackets and the awning length (see illustration).
4. When ordering replacement fabrics or roller tubes, specify the center-to-center measurement between the top casting and NOT the length of the fabric or roller tube (see illustration). When ordering new awnings, specify the length to nearest foot, not to a fraction of a foot.

Dometic produces special length awnings, for example: 10' 8", 14' 6", 16' 6", and 19' 6". When ordering fabric or roller tubes for these sizes, be sure of the measurement between the center of the top casting to center of top casting. For total overall awning mounting length, add 3 inches to the center-to-center measurement between the top castings.

WINDOW AWNINGS

1. When installing window awnings on a recreational vehicle, first measure the overall width of each window frame.
2. The awning length is obtained by adding 4" to 6" to the overall width of the window frame.

UNIVERSAL VINYL REPLACEMENT AWNING FABRICS*

Dometic can cut fabric for any awning made by other manufacturers.

1. Measure length of fabric end-to-end (A).

Note: Give us the exact measurement of your old fabric length – not including awning hardware. If brand is a Carter Awning, please also specify width of fabric (B).

2. Determine the diameter of polycord at roller tube. Polycord is sewn inside the fabric. Cut sections of your old cord and compare with diameters shown below.

*Other than A&E Awnings

WEATHERPRO | 9100 POWER | 9100 MANUAL AWNINGS

MEASUREMENTS

How to determine which model of hardware you can use.

Step #1. Measure from top of door to the awning rail. This distance will tell you if you have enough room to install a WeatherPro and Power Awning.

a. These minimums needed to use STANDARD hardware

(1) Under 6" - advisable not to use Power Awning, edge of door will scrape fabric

(2) Need 6" to install Power Awning with vinyl weathershield

(3) Need 7" to install Power Awning with metal weathershield

Note: Add 2" to the minimum needed if door is at or near center of awning*

b. These minimums are needed to use Basement hardware

(1) Need 11" to install Power Awning with vinyl weathershield

(2) Need 12" to install Power Awning with metal weathershield

Note: Add 2" to the minimum needed if door is at or near center of awning*

Step #2. Want to know how high roller will be from the ground in the extended/out position? Do the math:

a. Measure distance from ground to awning rail () minus 18" = () this is the distance roller will be from ground on Standard hardware*

b. Measure distance from ground to awning rail () minus 36" = () this is the distance roller will be from ground on Basement and 5th Wheel hardware**

Knowing the above measurements will allow you to make the correct choice as to which model of hardware you want to use on your Power Awning installation.

*Must have minimum of 6" door to rail to use Standard

**Must have minimum of 11" door to rail to use Basement. Center-to-center measurement between the top castings.

SPECIFICATIONS

Information you should know about the WeatherPro and Power Awning.

1. Extension when fully extended: 8 feet
2. Lengths available: from 12 to 21 feet in one foot increments
3. Length measured: from center of arm to center of arm
4. Width of arm: 3" (1 1/2": on each side of center)
5. Length of hardware back channel:
 - a. Standard hardware, 65 1/2"
 - b. Basement hardware, 62 1/4"
6. Depth of arm closed: 3 1/4"
7. Bottom bracket location from awning rail:
 - a. Standard hardware, 66"
 - b. Basement hardware, 63" (with extensions add 15")
8. Pitch of fabric when fully open:
 - a. Standard hardware, 13 degrees
 - b. Basement and 5th Wheel hardware, 20 degrees
9. Awning roller tube distance below awning rail when fully open:
 - a. 18" when using Standard hardware
 - b. 36" when using Basement hardware

Example: Awning rail is 110" from ground...

 - with Standard hardware awning roller tube will be 92" (7' 8")
 - with Basement hardware awning roller tube will be 74" (6' 2")

VERANDA ROOM

Makes the RV patio awning into a comfortable screened-in enclosure

- Can be used with power & manual awnings
- Use starter kit and additional zippered panels to create any size of room
- Standard or tall height – see “How to Measure” (below)
- Faster, easier set-up and take down – no tools needed
- 2’, 4’ and 8’ panels are available
- Super-durable fire-resistant screen fabric repels moisture, dries quickly to resist mildew
- Roll-down privacy panels are sewn in
- One-year limited warranty

1. STANDARD OR TALL? HOW TO MEASURE:

Measure distance from ground to the vehicle’s awning rail

93” to 110” = Standard Height

111” to 120” = Tall Height

2. USE THIS CHART TO DETERMINE WHICH PANELS ARE NEEDED:

EXISTING AWNING SIZE	REQUIRED COMPONENTS
8’ and 9’	Starter + 4’ panel
10’ and 11’	Starter + 4’ panel + 2’ panel
12’ and 13’	Starter + 4’ panel + 4’ panel
14’ and 15’	Starter + 8’ panel + 2’ panel
16’ and 17’	Starter + 8’ panel + 4’ panel
18’ and 19’	Starter + 8’ panel + 4’ panel + 2’ panel
20’ and 21’	Starter + 8’ panel + 8’ panel
22’ and 23’	Starter + 8’ panel + 8’ panel + 2’ panel
24’ and 25’	Starter + 8’ panel + 8’ panel + 4’ panel

XTEND-A-ROOM

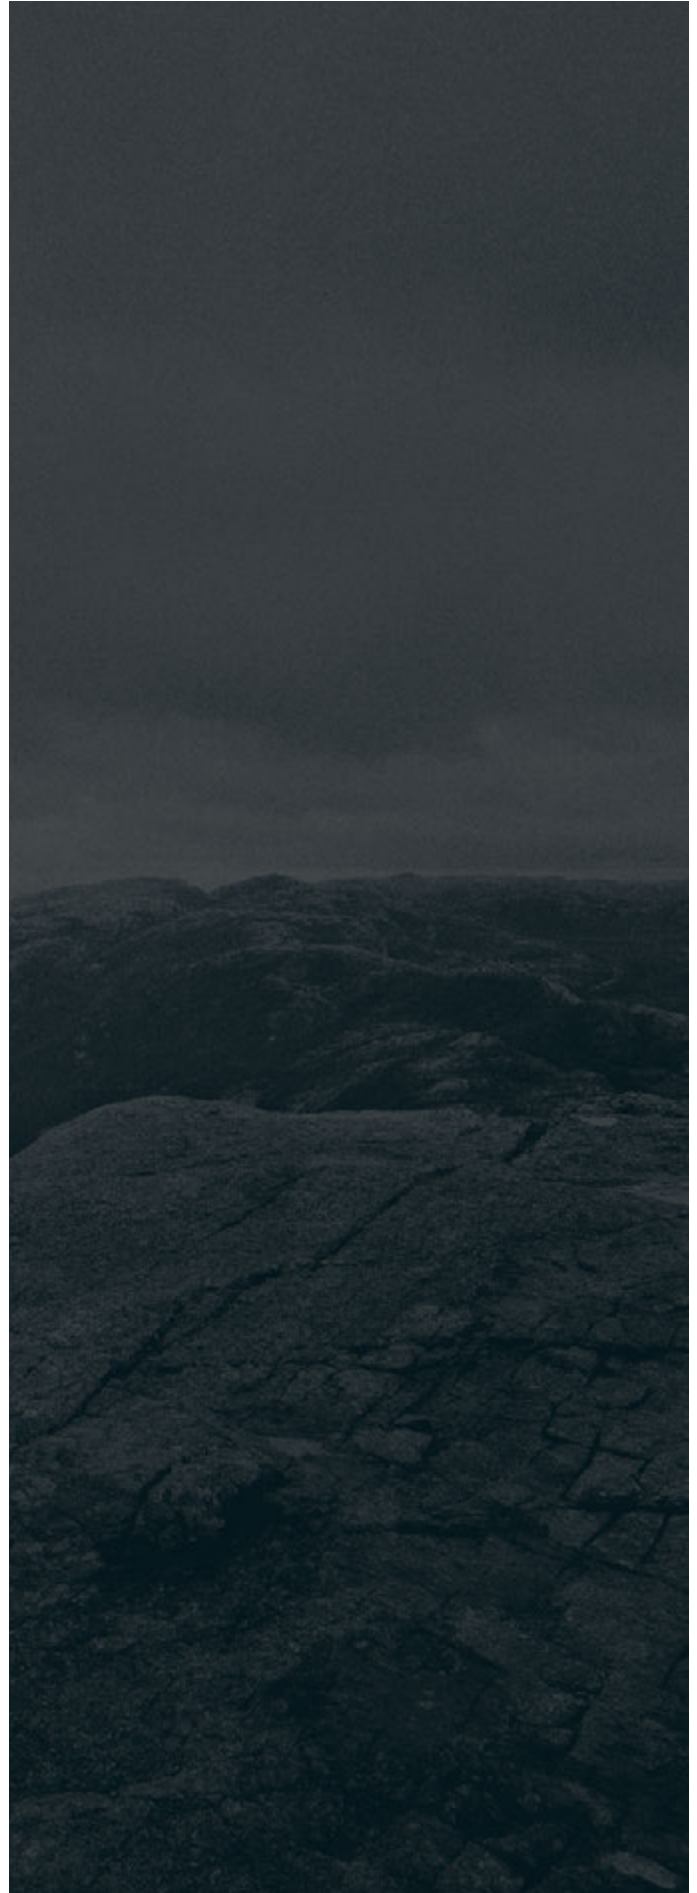

Expand your Sport Utility Trailer by as much as 60 square feet. After a full day of outdoor activities, nothing beats a comfortable space to kick back and relax. An XTEND-A-ROOM expands a trailer's living space with plenty of room to stretch out and revisit all of the day's adventures with friends and family.

- Two room sizes fit most sport utility trailers on the road today
- Easy-access ramp end opens for quick loading and unloading
- Adjustable support poles have ergonomically designed positive crimping locks to ensure proper fit
- Floor skirt tightly seals room to ramp gate without fasteners
- Quick bungee attachment keeps out wind and rain
- Front mounting poles fit into side pocket sleeves for a clean look
- Two stands support ramp and room securely
- Reinforced nylon seams withstand plenty of use
- Strong, rip-resistant fabric
- Weatherproof privacy panels add rain protection and prevent wicking
- Full-view screens provide a scenic view

SOME DANGERS DON'T GROWL FIRST

SAFETY SOLUTIONS

CARBON MONOXIDE GAS ALARMS

Protect you and your family from the dangers of carbon monoxide gases. The Atwood CO alarm is less sensitive to humidity and “false” gases than other brands. Includes a loud alarm, digital display and patented fuel cell technology powered by batteries to utilize a more accurate sensor. Approved for ceiling mount applications. Includes three AA batteries. Industry leading 10 year life cycle.

ORDER NUMBER

32701	Non-Digital Alarm Gas CO White 5 Year Warranty
32703	Digital Alarm Gas CO White 7 Year Warranty

DUAL LP/CO ALARMS

Why have two separate alarms when you can have just one? Single unit detects both LP and CO gases! Uses chassis and battery power to help protect your family. Operates in six separate modes. ETL listed and tested to UL 2034, UL 1481 and CSA 6.19.00 for RV Applications.

ORDER NUMBER

36681	Dual LP/CO Alarm 12V White
31012	Dual LP/CO Alarm 12V Black
36689	Surface Mt. Box White
31128	Surface Mt. Box Black

LP GAS DETECTORS

Designed for tough RV environments, the Atwood LP Sensor alerts you to low concentrations of LP gas through red and green LEDs. If gas exceeds 2,000 ppm, a loud piercing alarm will sound. CSA listed. Adapter mount ring allows detector to fit the 3 7/8” x 3 1/8” cutout from the last generation of flush mount Atwood LP detectors.

MOBILE LIVING MADE EASY

As you will notice, Dometic is changing and has completed a global rebranding initiative. While there are many elements that will be immediately visible to you; like the new logo, new colors and new packaging. There are also quite a few exciting things behind the scenes that will become more visible in the coming months, including the new Dometic.com.

The new Dometic is one company, one brand, one promise. That promise is to provide smart, reliable products with outstanding design in the areas of Food & Beverage, Hygiene & Sanitation, and Climate Control to make mobile living easy.

While some of our familiar sub brand names like Atwood, Fan-Tastic Vent and SeaLand will be eliminated, the products, ingenuity and legacy remain. This initiative allows us to harmonize Dometic's resources into one cohesive global company. Therefore, we can unify all of the 22 manufacturing facilities, countless warehouses and our 6,500 employees to provide an even higher level of service, support and product excellence.

ONLINE SERVICE AND SUPPORT

Our unique online support system helps dealers order products, manage their account, and obtain essential product information quickly and easily.

To access Dometic's online order entry and customer support log onto www.eDometic.com and register for an account. Once you set a username and password you will be able to enter orders, check order status, look up spare parts and find out about the latest promotions and Dometic product news.

SMART SOLUTIONS, RELIABLE PRODUCTS, OUTSTANDING DESIGN

Dometic's job is to take care of our customers essential needs while living mobile. Therefore, we continue to develop new and innovative products, while improving our existing lines.

- We have added additional models to the already robust CFX line of portable refrigerator / freezers, including the CFX 100 and the CFX 65 single zone.
- You will also notice a new look to the CFX products, in addition to many of the models now having Wi-Fi capability to allow for connectivity to a new App which can be accessed by utilizing iOS or Android smart devices.
- Additional new, innovative products have been added to this years catalog including; the CC-32 Portable Refrigerator / Freezer, the new Ventless Washer / Dryer Combo and further items added to the cleaning and odor elimination.
