

American-Made Solar Attachment

The Comp Shingle Flashing (US) is a domestically-produced, versatile solution for attaching solar to composition shingle roofs. The flashing installs quick and easy with a single fastener. Its patented watertight technology utilizes a grommet-integrated flashing that combines with the Slotted L-Foot (US) for a seal that maintains the integrity of the roof.

Part Numbers:

FLSH-01-B1-US

LFT-FLSH03-B1-US

Patented Watertight Technology

An EPDM rubber bonded washer creates a watertight seal on top of the Slotted L-Foot (US) while the flashing has an integrated EPDM rubber grommet. When used with the L-Foot, a watertight seal is created. The cone-shaped grommet envelops the lag bolt completely and, when compressed, the bolt is completely sealed in place.

25-Year Warranty

Our attachments have a 25-year warranty, guaranteeing they will be free of defects in materials and manufacturing which materially impair the use of the products for the purposes for which they were designed.

Innovative Cone & Countersink

The cone-shaped grommet and L-Foot countersink interconnection create a tried and true watertight seal. When installed and fastened to the roof, this stack is compressed to form many layers of protection.
