

HOME BATTERY
Q.HOME+

THERE'S NO BETTER TIME THAN NOW TO ADD SOLAR + BATTERY TO YOUR HOME.

HAVE CONFIDENCE IN AMERICA'S NO. 1 CHOICE FOR SOLAR.

ELECTRICITY BILL SAVINGS

Charge your battery with solar during the day and discharge at night to avoid peak electricity rates. With Time of Use (TOU) utility rates already in effect in several parts of the U.S., you can customize your battery use to avoid costly peak rates, lowering electricity bills and shortening your system's payback period.

PROTECTION FROM GRID OUTAGES

Safeguard your access to electricity during moments of uncertainty. Natural disasters including wildfires, tropical storms and winter weather pose taxing threats to our vulnerable utility grid infrastructure. In the event of power outages, take back control of your power.

QUALITY SOLUTIONS FROM A SINGLE SOURCE

Put your trust in the industry's top choice for packaged panel + battery solutions and benefit from hassle-free care. Q CELLS is the no.1 market share leader for home solar panels and will be the single point of contact for all product and warranty support.

In a vast and ever-expanding marketplace of home energy solutions, we understand you have choices.

Long-term reliability, high quality standards, financial bankability, and market recognition are some important deciding factors to consider when selecting the right brand for your solar needs.

PLACE YOUR TRUST IN THE MARKET LEADER AND TAKE CONTROL OF YOUR ENERGY NEEDS WITH Q.HOME+.

FLEXIBILITY

The flexibility and scalability of Q.HOME+ enable a wide range of storage capacities to suit your home's electricity consumption needs. Choose from 4.5kWh up to 18.9kWh depending on the size right for your home. Already have solar? Q.HOME+ can pair with existing residential solar setups for a seamless retrofit.

LEADING BACKUP PERFORMANCE

Benefit from a 100% backup power function with 50% stronger backup capabilities than other leading storage solutions.

MOBILE MONITORING

Conveniently monitor system performance from your smartphone using the Q.HOME+ ESS Mobile App or through the desktop Q.HOME+ ESS Web Portal. Exercise control over your system by toggling amongst different operational modes (Force Time Use, Self Use, Back Up Mode, Feed in Priority).

RELIABILITY

Highly durable with an inclusive 10-year product warranty. As the single brand for all system components including modules, inverter and batteries, Q CELLS is the sole point of contact for all product and warranty support.
