

# Take a step toward a brighter energy future

**SYSTEMEDGE—COMPLETE SOLAR + STORAGE SOLUTIONS**

# YOUR BRIGHTER ENERGY FUTURE

## Designed for convenience, value and flexibility.

Whether going off-grid, adding backup power or looking to avoid peak rates, OutBack's SystemEdge packages take the guesswork out of selecting the right combination of solar + energy storage.

Each package is designed with value in mind for our distributors, installers and end-users.

### **DISTRIBUTORS**

#### **No battery inventory**

SystemEdge packages make it easy for your customers to select the right system for virtually any use-scenario or power requirement. Because batteries drop-ship from the manufacturer, you don't have to worry about managing, storing or shipping extra inventory.

### **INSTALLERS**

#### **Streamline your sales**

A single-brand, turnkey system is great for streamlining and simplifying the sales process, and SystemEdge is easy to install. Each package is designed to meet the most common power scenarios for your customers so you can focus on what you do best—install great systems.

### **END USERS**

#### **Your power, your way**

Regardless of your reason for investing in a battery-based system, OutBack has you covered. All our SystemEdge packages are designed with reliability in mind. Rest easy knowing you are covered in the event of a grid outage or that you'll always have power if you're living off-grid.

# SINGLE-BRAND SIMPLICITY

## Experience the SystemEdge advantage.

Our focus is to create a comprehensive whole. SystemEdge by OutBack provides complete renewable energy systems and energy storage without the complexity—That's why each component is engineered to work together seamlessly and easily.

### SINGLE-BRAND SOLUTION

No more mixing and matching system components. All SystemEdge packages are 100% OutBack built and branded so you can rest assured that your installation will be worry free.

### ADVANCED TECHNOLOGY

Every SystemEdge package features a FLEXpower integrated system or SkyBox true hybrid energy system, EnergyCell batteries and OPTICS RE monitoring and control.

### DELIBERATE DESIGN

Combining perfectly matched renewable energy power electronics and energy storage, each SystemEdge package is specifically designed to fill one of a range of common power scenarios.

### PACKAGE PRICING

By bundling our most popular solar + storage combinations, OutBack Power can offer pricing that is better than buying each component separately—saving both time and money.

### COMPLIANCE AND SAFETY

Count on the fully compliant SkyBox and FLEXpower Radians with FLEXware combiners for an easy permitting process right out of the box.

When the customer was presented the option of having a fully pre-wired solution that took the complication of trying to piece everything together, they were on board.

**STEVEN STARKS**  
SOLAR SALES ASSOCIATE

# YOUR POWER, YOUR WAY

## Choose what works best for you.

Merge energy independence with smart home technology for a range of common applications. Whatever your energy needs are, OutBack Power has the right combination of energy storage and power electronics.

### OFF-GRID

#### Become energy independent

True energy independence is only achieved when energy storage is integral to the system design. SystemEdge off-grid packages are designed to help you and your home escape the grid and get the most out of your energy storage with the latest battery technologies available.

### EMERGENCY BACKUP

#### Power when you need it

Nobody wants to be left in the dark when the grid goes down. Give yourself or your customers peace of mind with a SystemEdge package designed for emergency backup in the event of a planned or unplanned utility outage.

### TIME-OF-USE

#### Take charge of your energy

Smart solar power when you need it most—SystemEdge packages with SkyBox intelligently manage your energy usage to conform to time-of-use rates in your area. The advanced technology, single box design represents a breakthrough in power conversion, processing and control.

**Save up to 50% per kilowatt-hour**  
of energy used with self-consumption during  
peak pricing periods.\*

\*Only in utility districts that offer time-of-use metering plans. Experience may vary.

# THE SOLAR + STORAGE EXPERTS

## Work with the industry leaders.

OutBack leads the way with advanced battery-based renewable energy systems. From small, fully independent off-grid systems to large grid-connected installations, we provide the technology and products to capture, convert, store and use power harnessed from the sun.

1

### INTEGRATED SYSTEMS

Our pre-assembled and pre-wired power systems take the concept of fast, easy installation to a new level of performance, value and flexibility.

3

### ENERGY STORAGE

With high charge and discharge rates at an incredible cycle life, our Thin Plate Pure Lead (TPPL) technology allows you to get the most out of your energy storage.

2

### SKYBOX TRUE HYBRID ENERGY SYSTEM

SkyBox makes smart solar simple with an advanced technology single-box design, representing a breakthrough in advanced power conversion, processing and control.

4

### SYSTEM MONITORING AND CONTROL

OPTICS RE allows monitoring and control of a system anytime, anywhere—protecting your investment and maximizing benefits.

### OUR COMMITMENT TO COMPLIANCE

Rapidly changing regulatory requirements can make staying in compliance challenging. Every SystemEdge package is certified to and registered for all current major programs and requirements, including the CA Rule 21 (California), HECO Rule 14 (Hawaii), SGIP, UL 1741 SA and UL 9540. As more states and jurisdictions adopt these requirements, you can rest easy knowing that we've already got you covered.

**Powering the future  
everywhere for everyone.**
